Work Experience

ASOS | Web Engineer - Nov 2019 - Present

I am currently part of the web engineering team responsible for the ASOS website, regularly visited by millions of customers around the world. Working in Agile teams, we follow strict engineering best practices to ensure our product is of the utmost quality. The website consists of micro frontends, built in modern frameworks (E.G. React with Redux) and each thoroughly developed through code reviews and automated testing. We will soon be moving to Azure Kubernetes Service (AKS) for deployment to further improve our product.

Sky | Digital Developer - Jan 2017 - Aug 2019 | Senior Digital Developer - Aug 2019 - Nov 2019

As part of the team responsible for Sky's digital marketing campaigns, my role involved producing JavaScript banners to be deployed in the Google DoubleClick Studio environment and developing tools and applications to be used within the team to improve our day to day work and drive efficiency. These ranged from Google Chrome extensions to React single page apps. My role also involved training and mentoring new starters on the development team.

Streeten Design | Web Developer - May 2015 - Dec 2016

As sole web developer at Streeten Design, I was entirely responsible for the transformation of static Photoshop layouts into fully functional websites. As well as the obvious skills required to fulfil such a role in terms of design and the "look and feel" of a website (HTML, CSS, JavaScript, jQuery), my time was also spent on more technical aspects of certain projects. From using PHP and MySQL to retrieve information from the back-end database, to communicating with external API's.

Career Break | Feb 2012 - May 2015

This time was spent travelling for a year, renovating my parents' home and teaching myself web dev.

IRIS Software Group | Customer Support, then Technical Consultant | Nov 2006 - Feb 2012

Education

London South Bank University | First class degree in BSc(Hons) Computing Studies 2003 - July 2006

John Ruskin College | AVCE ICT - (BB) | Two AS Levels (B,E) | GCSE (C) 2001 - 2003
